

THE WORLD'S #1 PREMIUM FOOT ORTHOTIC

OVER 30 MILLION PAIRS SOLD

## The Aetrex Technology Difference

Our mission at Aetrex is to help people stay comfortable and healthy on their feet. We believe this all starts with a comprehensive foot scan. Over the past 20 years, we've placed over 12,000 foot scanners around the world that have performed more than 50 million scans. With all of this data, it's no surprise that we really know feet. And we recognize this is our secret sauce for developing really great orthotics and shoes.

## Custom Selected Orthotics for Your Specific Foot Type and Footwear Style

Recommended by doctors and pedorthists worldwide, Aetrex Orthotics are recognized as the #1 premium foot orthotic on the market today. Millions of pairs have been sold to consumers seeking the quality & support of custom-made orthotics at an over-the-counter price. Aetrex Orthotics are available in a variety of styles to provide a custom selected solution based on your specific foot type and footwear style. Options include metatarsal support to provide additional protection at the ball-of-the-foot, and medial posting to gently realign the rearfoot and control overpronation.

# The Aetrex Advantage

---

## Alignment and Biomechanical Efficiency

A key goal of Aetrex Orthotics is to provide alignment and to keep the foot closer to the neutral position throughout the gait cycle. Proper alignment helps minimize overpronation and reduces stress on the plantar fascia, knees, hips, and back.

## High-Tech Materials to Benefit Your Health

Say goodbye to plastics and other hard, uncomfortable materials. Aetrex Orthotics utilize premium, shock absorbing materials designed to cushion and support the body, while protecting the foot. The collection integrates high-tech, lightweight modern materials such as memory foams, polyurethanes, and slow recovery foams.

## Strategically Placed Arch Support

Supporting the arch in the proper place is crucial. Looking at your bare feet, the apex of the arch appears to be in the middle of the foot. An X-ray can confirm that the apex is actually further back. The contour, position, and height of Aetrex's unique arch support aligns anatomically in the proper place to help support our bodies from the ground up.

# The Aetrex Orthotic Fit System

## FIT A

REARFOOT  
POSTED

FOREFOOT  
NEUTRAL

Recommended for low to flat arches  
or those who overpronate.

Orthotic Category: **20**

# HOCKEY SERIES

**Bauer/Aetrex Hockey Orthotics** are the first collection engineered specifically to perform in hockey skates. Driven from Bauer's deep understanding of skating mechanics and the learnings from over 50 million Aetrex foot scans, Bauer Hockey and Aetrex have co-developed a customized orthotic solution. These orthotics reduce negative space in skates, help stabilize the foot from over rotation, and help improve lower body alignment to provide a performance boost to every stride.

Featuring an AeroCell™ base for cushioning and energy return, these orthotics also incorporate Aetrex's anatomically placed arch support for proper alignment. The top cover features perforations for moisture management and airflow and areas with silicone SmartGrip™ to minimize in-skate movement.

## FASHION (WOMEN) & IN-STYLE (MEN) SERIES

Aetrex Fashion & In-Style Orthotics provide comfort and support for your favorite stylish footwear. These innovative orthotics are ultra lightweight and have a Cobra shape design to fit inside shoes that don't usually offer support.

These orthotics have a thermoplastic urethane base that helps with shape retention, and feature Aetrex's strategically placed, proprietary arch support to help biomechanically align your body. The soft polyurethane top cover delivers comfort and breathability, while the rearfoot adhesive helps hold the orthotic in shoe. Finally, fashionable heels, flats and dress shoes can feel great on your feet, even after a long day.
